

ACTIVITY: NATURE SHADES

CAN YOU FIND ALL THE COLOURS OF THE RAINBOW?

Nature Rainbow Challenge

Are you up for a little challenge that you can do in your garden, neighbourhood or local woods?

- * Use an ice cube tray as an all-weather collector (or anything else you can find around the house).
- * Your challenge is to collect as many different colours and shades of colours as you can from outside.
- * Take mini 'ant-bites' from pieces of nature (or other items) that you find, so as not to harm or deplete nature.
- * If you are unsure whether to touch an object, ask an adult.
- * How many different colours and shades can you find?
- * What is the most popular colour?
- * What is the least popular colour?
- * Why do you think this is?
- * Do you think this would change in a different season?

Don't forget to share with us what you have found.
Send us a photo. #stayconnected #keeplearning
